- The pdf file of the screencapture is found in the submission folder in Brightspace

Maven Version

First I run this command line:

```
mvn --version
```

And I get this output:

```
Lab-6 — -zsh — 135x9

Last login: Tue Jul 13 21:25:17 on ttys000

[patrickloranger@Patricks-MacBook-Pro - % cd /Users/patrickloranger/Documents/4.\ Summer\ Term\ 2021/SEG\ 3103/seg3103_playground/Lab-6 ]

[patrickloranger@Patricks-MacBook-Pro Lab-6 % mvn --version

Apache Maven 3.8.1 (05c21c65bdfed0f71a2f2ada8b84da59348c4c5d)

Maven home: /usr/local/Cellar/maven/3.8.1/libexec

Java version: 16.0.1, vendor: Homebrew, runtime: /usr/local/Cellar/openjdk/16.0.1/libexec/openjdk.jdk/Contents/Home

Default locale: en_CA, platform encoding: UTF-8

OS name: "mac os x", version: "11.4", arch: "x86_64", family: "mac"

patrickloranger@Patricks-MacBook-Pro Lab-6 %
```

Compiling Maven

After installing maven run the following command

Here is a screenshot of the successful compiling using maven:

Packaging the bookstoreApp

After comiling maven run the follwoing command

```
mvn package —DskipTests
```

The command will download a number of files, here's a proof that we ran this command (beginning and end of the run).

Beginning of the run

End of the run

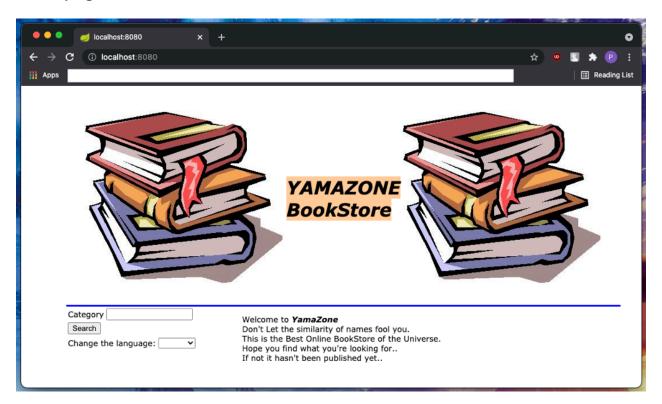

Running The Server and Viewing The App

Once everything is downloaded and ready, I run this command line to open the localhost server:

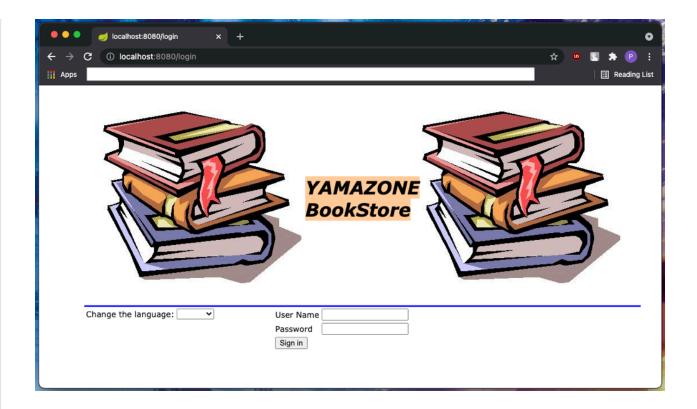

```
java –jar ./target/BookstoreApp–0.1.0.jar
```

```
patrickloranger@Patricks-MacBook-Pro Lab-6 % java -jar ./target/BookstoreApp-0.1.0.jar
Press Enter to stop server
```

Running The Tests

The following command was run to execute the default tests

```
mvn test
```

After initially running the tests, I added a new selenium test to the code:

```
driver.get("http://localhost:8080/login");
WebElement userName = driver.findElement(By.id("loginId"));
WebElement password = driver.findElement(By.id("loginPasswd"));
userName.sendKeys("admin");
password.sendKeys("password");
driver.findElement(By.id("loginBtn")).click();
driver.get("http://localhost:8080/admin");
driver.findElement(By.id("addBook-category")).sendKeys("Fiction");
driver.findElement(By.id("addBook-id")).sendKeys("h11023");
driver.findElement(By.id("addBook-title")).sendKeys("Of Mice and Men");
driver.findElement(By.id("addBook-authors")).sendKeys("John Steinbeck");
driver.findElement(By.id("longDescription")).sendKeys("The book talks about two ranch workers during the great depression");
driver.findElement(By.id("cost")).sendKeys("20.00");
driver.findElement(By.name("addBook")).click();
String feedbackMessage = driver.findElement(By.cssSelector("#feedback h2")).getText();
assertEquals("Successfully added book", feedbackMessage);
String title = driver.findElement(By.id("title-h11023")).getText();
assertEquals("Of Mice and Men", title);
```

Finally, I ran the testing command line one more time to see if my new test passes:

It passed and it works.
